Office Action Summary	Application No. 10/777,978	Applicant(s) MANLEY, STEPHEN L.	
	Examiner Etienne P. LeRoux	Art Unit 2161	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 36 and 39 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 36 recites “if the second modification time and the first modification time are not the same.” The metes and bounds of the claim language cannot be determined because it is unclear how many modification times is/are being claimed. Specifically, if the first modification time and the second modification time are equal, then there is only one (emphasis added) modification time.

Claim 39 includes similar language to claim 36 and is thus rejected on a similar basis.

Allowable Subject Matter

Claims 1-12, 14-35, 38 and 40-72 are allowable.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2161

Claims 36 and 39 are rejected under 35 U.S.C. 102(b) as being anticipated by US Pat No 5,596,706 (Shimazaki et al), hereafter Shimazaki, as best examiner is able to ascertain.

Claim 36, 39:

Shimazaki discloses:

retrieving a first modification time on the source system for the data set;

opening the data set on the source system and transmitting the data set from the source system to the destination;

after completing transmitting, closing the data set on the source system and retrieving a second modification time on the source system;

if the second modification time and the first modification time are not the same, providing by the source system an instruction to the destination system to revert to an earlier copy of the data set on the replica [Fig 35].

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 37 is rejected under 35 U.S.C. 103(a) as being unpatentable over Shimazaki as applied to claim 36 above, and further in view of US Pat No 6,353,829 (Koblenz et al), hereafter Koblenz.

Claim 37:

Art Unit: 2161

Shimazaki discloses the elements of the claimed invention as noted above but does not disclose providing the instruction includes transmitting an undo standalone header in a data stream that includes the data set, the standalone header identifying the data set and indicating an undo header type. Koblenz discloses providing the instruction includes transmitting an undo standalone header in a data stream that includes the data set, the standalone header identifying the data set and indicating an undo header type [Fig 13]. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Shimazaki to include above limitation(s) as taught by Koblenz for the purpose of providing a memory allocation system [abstract].

Response to Arguments

Applicant's arguments filed 8/23/2007 have been fully considered but are moot based on above new grounds of rejection.
